

head of the ATF since that position became Senate-confirmable in 2006.

The consideration of nominations is one of the most important functions of the Judiciary Committee. I am hopeful that we will not see the same sort of obstructionism and dilatory tactics that we encountered during 2013.

In the coming year, we must redouble our efforts to work past our differences to find bipartisan, commonsense solutions to our Nation's problems; I know that that is what Vermonters expect of me. We have seen so far in this Congress an unprecedented level of gridlock, partisanship, and political brinksmanship, which culminated in a costly and unnecessary Republican government shutdown in October. We can and must do better, and I hope that we can put the obstructionism of this past year behind us. The American people expect and deserve better. We owe it to our constituents to work together to pass commonsense bipartisan compromise legislation, and we have already seen that we can do just that. I look forward to working with my colleagues on both sides of the aisle to build upon the progress we have made and find meaningful solutions to the many challenges we face as a country.

VERMONT'S GRANITE INDUSTRY

Mr. LEAHY. Mr. President, I would like to take a few moments to talk about a unique Vermont asset that recently gained national attention: the granite industry. Due largely to its versatility, high quality and immense quantity, granite proved integral to the early economic development of my home State and continues to play a vital role today.

The people of Barre, VT, have been mining granite since the 1800s, when it was learned that the unusually high quality of the stone found in the town's hillsides was in high demand. This discovery had local and global implications. Granite from the Rock of Ages quarry in Barre was supplied to help construct columns in the Vermont State House that still stand today. Additionally, the art of stone carving that the granite industry created attracted skilled immigrants to Vermont from throughout Europe and Canada. In fact, both my grandfathers were stone carvers in Vermont.

With its museum, tours, and even a sandblasting experience, the Rock of Ages quarry has expanded its offerings to serve as an educational and historical site, attracting visitors from around the world. Recently, the Timberland Boot Company visited the quarry for a photo shoot. They became so enamored by the community and its people that they ended up highlighting the area in a new line of footwear, noting that it was influenced by "a 150-year-old granite industry that transformed the tiny New England town into an international destination for commerce and art."

I am very proud of the people of Barre for embracing and preserving the

important history and culture the granite industry brought to Vermont. The recognition that the Timberland Boot Company gave to Rock of Ages is well deserved.

I ask that an article printed in The Barre-Montpelier Times Argus on November 26, 2013, "Marketers find Barre history just the right fit," be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Barre-Montpelier Times Argus, Nov. 26, 2013]

MARKETERS FIND BARRE HISTORY JUST THE RIGHT FIT

If you don't think the local granite industry has a story still worth telling, try selling that to the folks at The Timberland Boot Co., who turned what was supposed to be a routine photo shoot at Rock of Ages last year into a multimedia campaign that is very Barre.

"It's pretty impressive," Rock of Ages spokeswoman Amanda Pittsley said of the newly launched digital campaign for Timberland's high-end heritage collection.

"Originally, they were just looking for a rugged place to go with their new line of boots," Pittsley recalled. "They were just hoping to use a panoramic of the top of the quarry as an intro to this 'mine' of products as far as their industrial boot."

The photo shoot a year ago turned Quarry Hill into boot hill for a day and a half.

"We literally spent all day carrying around boots," she recalled of Rock of Ages' attempt to accommodate a photographer and a creative director interested in making the most out of a texture-rich setting that includes everything from the frequently photographed quarry with its towering derricks to rough-cut granite blocks and weathered railroad tracks.

"They wanted different textures to show behind the boots," she said. "We were just going to be the granite backdrop."

Or so Pittsley thought until she recently visited <http://abington.timberland.com> and learned the photo shoot had "morphed into an entire product line" that makes up Timberland's latest Abington Collection—a nod to the company's first incarnation as The Abington Shoe Co.

"The Abington Fall '13 Collection was influenced by the people of Barre, Vt., and a 150 year old granite industry that transformed the tiny New England town into an international destination for commerce and art."

So says the slick website, which announces a product line that features several styles of boots and a shoe "designed with the Italian sculptor in mind."

The site features a collection of historic Barre photographs to go along with the marketing shots that were taken last year, a couple of timelines, and a few video cameos featuring Italian-born granite sculptor Giuliano Cecchinelli.

"Shop the collection that Barre inspired," it concludes.

Pittsley was impressed.

"You would have thought we went to them," she said.

According to Pittsley, it isn't unusual for Rock of Ages to field photo requests from fashion editors and companies like Lenovo interested in using the quarry as a backdrop, but the company rarely gets to see the end result.

"We're just a site," she said.

Pittsley said she never imagined the sort of spread Timberland came up with when the

photographer and creative director headed into Barre to see what they might find at the Vermont Granite Museum and the Vermont History Center.

What they found, Pittsley surmised, was a story ready to be told.

"I think they were just overwhelmed with how much information there was," she said.

Though they can be purchased online, the boots said to be inspired by the people and the industry that put Barre on the map are available at only two Vermont locations, according to the website: Maven on Cherry Street in Burlington and Manchester Footwear on Main Street in Manchester.

DETROIT DIESEL

Mr. LEVIN. Mr. President, 2013 marks a significant milestone for a dynamic company based in Detroit, MI. It is the 75th anniversary of the founding of Detroit Diesel. Detroit enjoys a rich automotive heritage and has been a hub of innovation and manufacturing for generations. Many companies throughout the State have contributed to this impressive legacy. One of those companies is Detroit Diesel, and I am proud to recognize this innovative company here today.

Founded in 1938, Detroit Diesel has emerged as a leader in the heavy-truck engine industry and an important contributor to Michigan's economy. What began as a company focused on producing engines for the Allied Forces in World War II has expanded through the years to include an array of products used in a number of sectors. Detroit Diesel has a well-earned reputation for quality, has championed a number of technological breakthroughs in the manufacturing industry and is a committed community partner. These accomplishments are a tribute to the many hard-working people that make their success possible year after year. And I have witnessed firsthand some of the cutting edge technologies Detroit Diesel has pioneered.

Demand Performance is Detroit Diesel's hallmark, and they have achieved this in their product development and in the community. With a workforce of more than 2,000 in the city of Detroit, Detroit Diesel is a wonderful example of what is possible through cooperation and economic opportunities. This is evident in the announcement last fall of a \$120 million capital investment by Detroit Diesel. This investment brings greater hope and new possibilities for the company and the city. It is also evident in their commitment to the community through their many charitable activities focused on helping families, protecting and improving the environment, and assisting various educational endeavors.

During its 75 years of existence, Detroit Diesel has made a significant contribution to Michigan's economy. As a lifelong Detroit resident, I am keenly aware of how business development helps to create and sustain jobs, to stabilize neighborhoods and to build the middle class. I commend Detroit Diesel for their entrepreneurial spirit and for

their high quality products. I wish them the best as they continue to forge ahead, create jobs and innovate.

NATIONAL PEDIATRIC RESEARCH NETWORK ACT

Mr. WICKER. Mr. President, I wish to celebrate the passage of the National Pediatric Research Network Act, a bipartisan piece of legislation that was signed into law last month.

I wish to thank my colleague, Senator SHERROD BROWN, for his leadership on this issue. I was pleased to work with him on this important initiative in the previous two Congresses.

The National Pediatric Research Network Act expands and enhances our Nation's commitment to pediatric research by providing the infrastructure that is needed to advance the field for decades to come. To do so, the law includes training and support for early-career investigators and authorizes the National Institutes of Health to select a number of competitive pediatric research consortia. Each consortium, comprised of multiple institutions, will focus on specific, high-impact pediatric research, including basic, translational, and clinical investigations.

In addition, the law specifically states that a subset of the consortia must focus primarily on pediatric rare diseases. Participating institutions are encouraged to coordinate with multisite clinical trials of pediatric patient populations. This will provide needed support for the families of children suffering from rare diseases, such as Duchenne muscular dystrophy, the most common fatal genetic disorder diagnosed in childhood, and spinal muscular atrophy, the leading genetic killer of children under the age of 2.

The National Pediatric Research Network Act's collaborative approach allows us to rethink and improve the way pediatric research is conducted. Shared resources among pediatric institutions help maximize the government's return on investment and avoid duplication. Rather than allocating additional funds at the taxpayers' expense, the law seeks to accelerate treatments for pediatric diseases by emphasizing collaboration and the efficient use of limited Federal resources.

I wish to thank the many families and organizations in Mississippi and across the country that helped build the bipartisan support necessary for passage of this bill, including Children's Healthcare of Mississippi, FightSMA, Parent Project Muscular Dystrophy, the Coalition for Pediatric Medical Research, Children's Hospital Association, National Organization for Rare Disorders, National Down Syndrome Society, the Federation of Pediatric Organizations, and the Kakkis EveryLife Foundation.

Simply put, this law will result in an improved and coordinated NIH pediatric research investment. This effort will help children across our Nation

overcome numerous devastating diseases and conditions. I look forward to working with my colleagues to ensure the timely and effective implementation of this law, and I will continue to fight for the health and well-being of our children.

REMEMBERING U.S. ARMY SPECIALIST DANIEL ECKSTEIN

Mrs. SHAHEEN. Mr. President, I rise with a heavy heart to memorialize the promising life and service of U.S. Army SPC Daniel Eckstein, who died on December 10 at the young age of 22. Specialist Eckstein was a member of the 3rd Special Forces Group, serving as an unmanned aerial vehicle mechanic at Fort Bragg in North Carolina.

Daniel was born in Lowell, MA on January 5, 1991, to Hans and Sharon (Green) Eckstein, and spent the first 6 years of his life there. In 1997, Daniel moved to Nashua, NH, where he remained for his formative years until his graduation from Nashua High School North as a member of the class of 2009. During high school, Daniel eagerly competed as a member of the Nashua North Titans baseball team. He was also a passionate New England Patriots and Boston sports fan.

Daniel enlisted in the Army in 2011, and following basic training he went on to successfully complete both Army Airborne School and the Warrior Leader Course. A testament to Daniel's drive for excellence as a soldier, he was awarded the Army Commendation Medal, the Army Achievement Medal, the Army Good Conduct Medal and the National Defense Service Medal.

Daniel loved his family, and was a proud father to his young son Brayden. It is my hope that during this extremely difficult time, Daniel's family and friends will find comfort in knowing that Americans everywhere appreciate deeply his vow to sacrifice his life in the defense of our country so that the rest of us may continue to live in peace and freedom.

Along with his parents Hans and Sharon, Daniel is survived by his wife, Kristina Eckstein, whom he married on January 9, 2011; his son, Brayden Daniel Eckstein; his sister, Amy Eckstein of North Carolina; his stepfather, Edward McLaughlin of Lowell, MA; his maternal grandmother, Barbara Green of Nashua; his grandparents, Peter and Elaine Beaton of Nashua; his father-in-law and mother-in-law, Michael and Darlene Burton and their daughter Summyr of Nashua; also aunts, uncles and cousins. This patriot will be missed by all.

I ask my colleagues and all Americans to join me in honoring the life and service of this brave young American, Daniel Eckstein.

ADDITIONAL STATEMENTS

REMEMBERING WILLIAM SCRANTON

• Mr. CASEY. Mr. President, today I wish to remember and honor former Pennsylvania Governor William W. Scranton who passed away July 28, 2013. In both his public and his private life, Governor Scranton was always working to serve Pennsylvania and the Nation.

Bill Scranton was a descendent of colonists who came over on the Mayflower and his family founded Scranton, PA. He served in the Army Air Corps during World War II and was an assistant to Secretaries of State John Foster Dulles and Christian Herter during the Eisenhower administration.

In 1960, Bill was elected to Congress and was dubbed a "Kennedy Republican" for his support of the President's programs, including the Peace Corps, urban renewal projects and the minimum wage. He would only serve 2 years in the House of Representatives, before he was elected Governor of Pennsylvania in 1962.

As Governor, he signed into law legislation creating the State community college system, the State Board of Education, and the Pennsylvania Higher Education Assistance Agency, PHEAA. During his four years in office, unemployment went down and wages went up. Limited to one term, he left elected office in 1967, but that did not end his public service.

Under President Nixon, Governor Scranton served as a special envoy to the Middle East and after the Kent State University shooting in Ohio in 1970, President Nixon again called on him to serve, appointing him the Chairman of the President's Commission on Campus Unrest. President Ford also reached out to Governor Scranton to serve, appointing him Ambassador to the United Nations where he prioritized human rights.

After leaving the United Nations, Bill Scranton retired. Throughout his life he was known as a man of integrity who said and did what he thought was right. In 2000, he received the Pennsylvania Historical and Museum Commission's Founders Award, which is given to a living person who represents the ideals of William Penn in individual rights, religious tolerance, representative government, public support of education, and free enterprise. Bill remained devoted to the city that bears his family name. He worked with various civic and charitable organizations and continued to advocate for economic development and job creation projects. His son, William W. Scranton III, followed him into public service as Lieutenant Governor of Pennsylvania from 1979 to 1987.

My thoughts are with his family and we thank him for his life of service to our Commonwealth and our country. •
